

SecurTrac in action

DOMINO 8 READY

Security Team Member of a Global Pharmaceutical Company

The SecurTrac product has helped us meet and exceed our expectations for a quick, efficient, and cost effective way to keep document audit trails, comply with FDA Part 11, and SOX compliance. We are very satisfied with the value SecurTrac adds to our business and closely working with the developers and administrators to provide us with a solution to meet our compliance issues. SecurTrac is continually helping our company and customers save money by having a solution that will work for any Notes/Domino application. The ability to monitor documents, ACLs and designs gives our customers comfort that we will be able to find the problem and correct it by using the monitoring tools provided by SecurTrac. With new products and new laws coming out we are very likely to hold our relationship with the manufacturer of SecurTrac, Extracomm, in great regards. We recommend SecurTrac to any company in need of a solution for FDA Part 11 and SOX compliance.

Security Team Member of a Global Rental Car Company

SecurTrac is the only product in the Notes/Domino market that we could find that has specifically met our very customized needs. In addition to a good product, SecurTrac's customer service continues to work closely and efficiently on our specific customized needs. We have a very good working relationship with the developers of SecurTrac, as well as their technical staff. We are completely satisfied with the product and even more satisfied with the customer service my company continues to receive. We were able to resolve several security findings with SecurTrac and in addition, we have found other uses for the SecurTrac than originally purchased for. With the extremely positive outcome of what SecurTrac is continually doing for my company, we are very likely to engage with Extracomm for many years to come.

Security Team Member of a Global Pharmaceuticals Development Company

Our company uses Extracomm's SecurTrac and SecurEsign to satisfy our compliance needs, as SecurTrac with our own internal application is seamless. The sales and technical staff of SecurTrac have provided excellent customer service, both before and after the sale. I only had to call customer service once, the response time was great and the issue was resolved in a timely manner. Since we started using SecurTrac and their complementary electronic signature tool, SecurEsign a year and a half ago today, I am very satisfied with the software and extremely pleased how friendly and yet comprehensive SecurTrac is to use. SecurTrac is very easily implemented and addresses my company's compliance needs for audit trails and electronic signatures. I would definitely continue as a SecurTrac user and would highly recommend SecurTrac to other businesses and business associates.
